EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Pamela Politis on January 17, 2007.

The application has been amended as follows:

Please cancel claims 6, 34, and 36-41.

2. The following is an examiner's statement of reasons for allowance: the claims are drawn to methods of producing a double d-loop in a target sequence of a double stranded nucleic acid by adding a first oligonucleotide bound to recombinase to a double stranded target nucleic acid followed by the addition of a second oligonucleotide free of a recombinase to the mixture of the first oligonucleotide bound to a recombinase and the target double stranded nucleic acids. The claims are further drawn to method for detecting the presence of a target sequence, method of purifying a target sequence in a double stranded nucleic acid, methods of protecting a restriction site within double stranded nucleic acids, methods of cleaning at or near a target nucleic acid sequence by forming a double d loop at the target of the double stranded target sequence by adding a first oligonucleotide bound by a recombinase followed by addition of a second oligonucleotide free of a recombinase and detecting the double d loop formation. The closest prior art is that of Sena et al. in view of Bryant et al. The claims are allowable over the prior art

because Sena et al. in view of Bryant et al. does not teach or fairly suggest adding a second oligonucleotide free of recombinase to form a double d loop structure. Bryant et al. teach method of using the optimal amounts of a recombinase, RecA and teach the optimal concentration is 10% coverage of the DNA, and further teach the amount of RecA per nucleotide, not per DNA strand/molecule thus Bryant et al. does not teach the use of an oligonucleotide that is free of a recombinase. Therefore Sena et al. in view of Bryant et al. does not teach or suggest the use of a second oligonucleotide that is free of recombinase to form to a double d-loop formation.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sarae Bausch whose telephone number is (571) 272-2912. The examiner can normally be reached on M-F 9am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla can be reached on (571) 272-0735. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at (866) 217-9197 (toll-free).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to (571) 272-0547.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
